DETAILED ACTION

1. Applicant cancelled claims 1-9.

Claim Objections

2. **Claim 10** is objected to because of the following informalities:

Claim 10 recites the limitation "the mutual orientation" in line 7. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Specification

The disclosure is objected to because of the following informalities: "the mutual orientation is not supported by the specification". Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 10, line 7, the term "the mutual orientation" is not described in the specification of this application as filed. This newly added term is not defined by the Applicant's disclosure and Examiner could not determine for certain to what term in the disclosure "the mutual orientation" refers to.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10, lines 7-8, recites the mutual orientation so as to convert into the ground coordinate system". It is not clear from the claim what it is converted into the ground coordinate system. Therefore, claim 10 is considered to be indefinite.

Response to Arguments

5. Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2857

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
